Såg

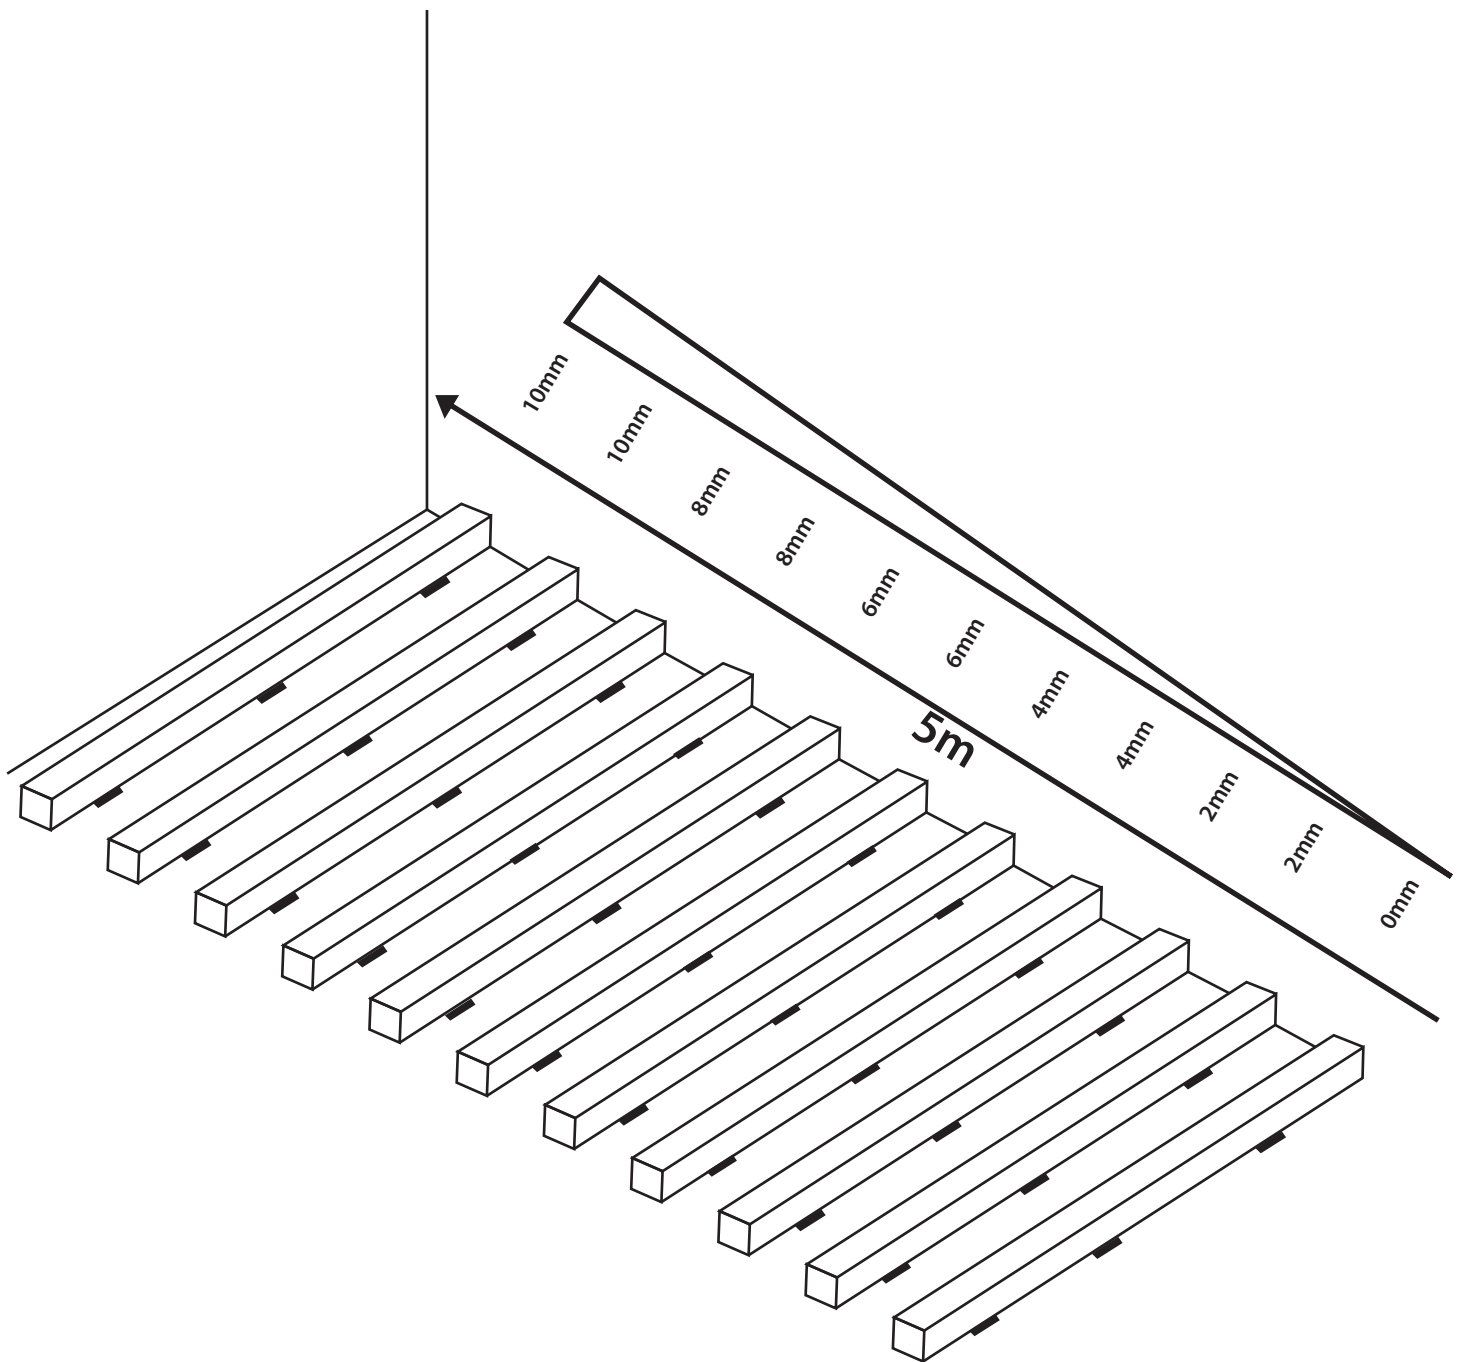

Vattenpass

Regelavstånd (40 cm)

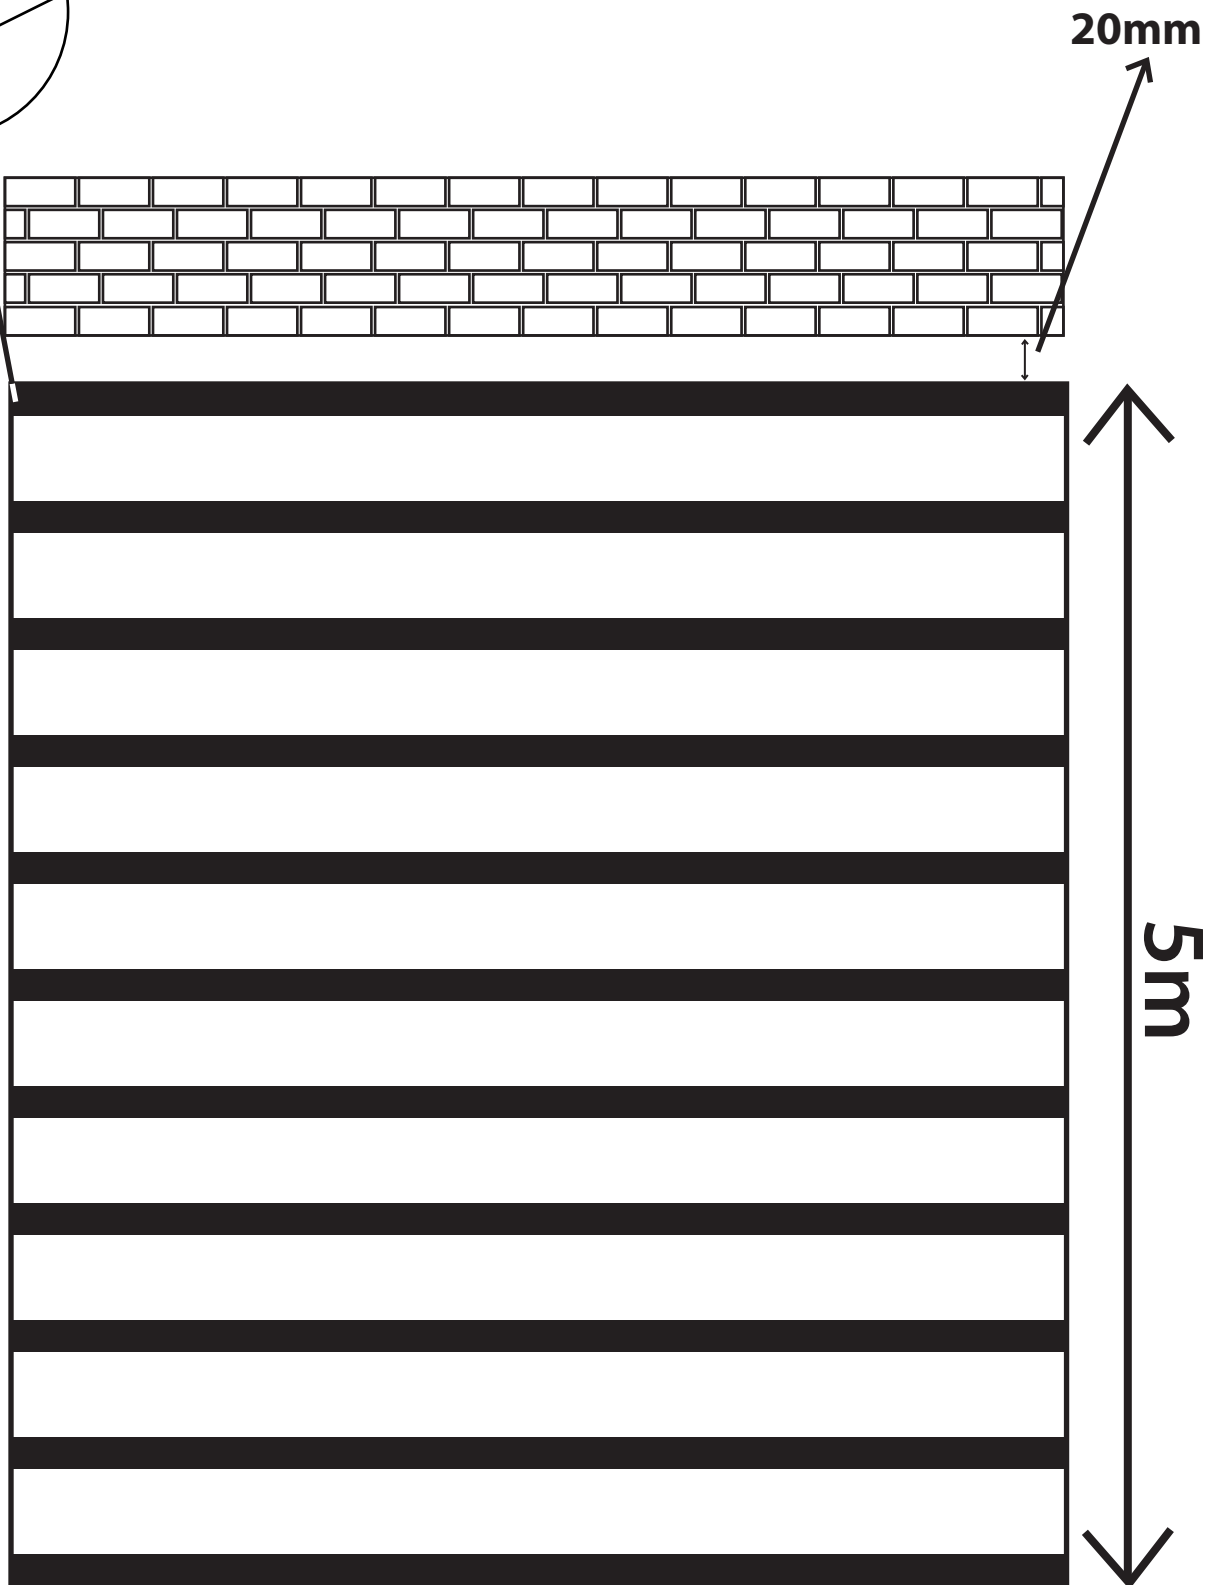

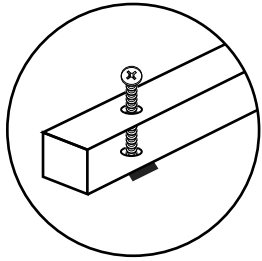

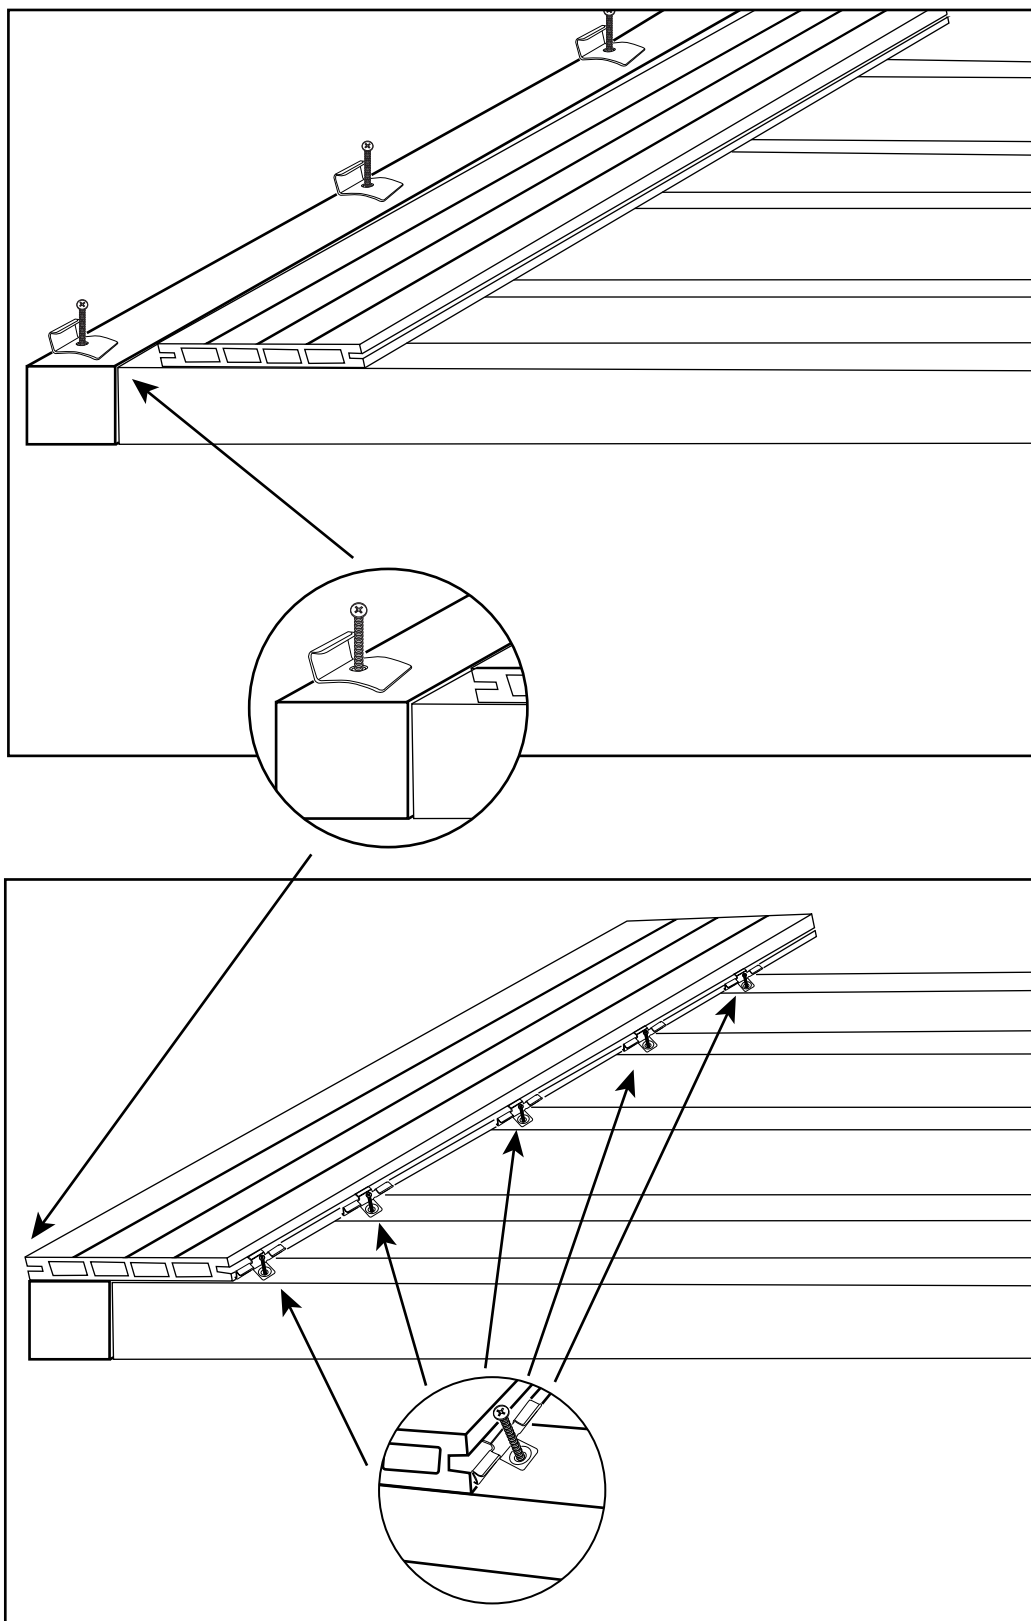

Minst 8 mm mellanrum mellan skarvarna

* Däcket bör ha en lutning på 2 mm för varje meter för att vattnet ska kunna rinna av.

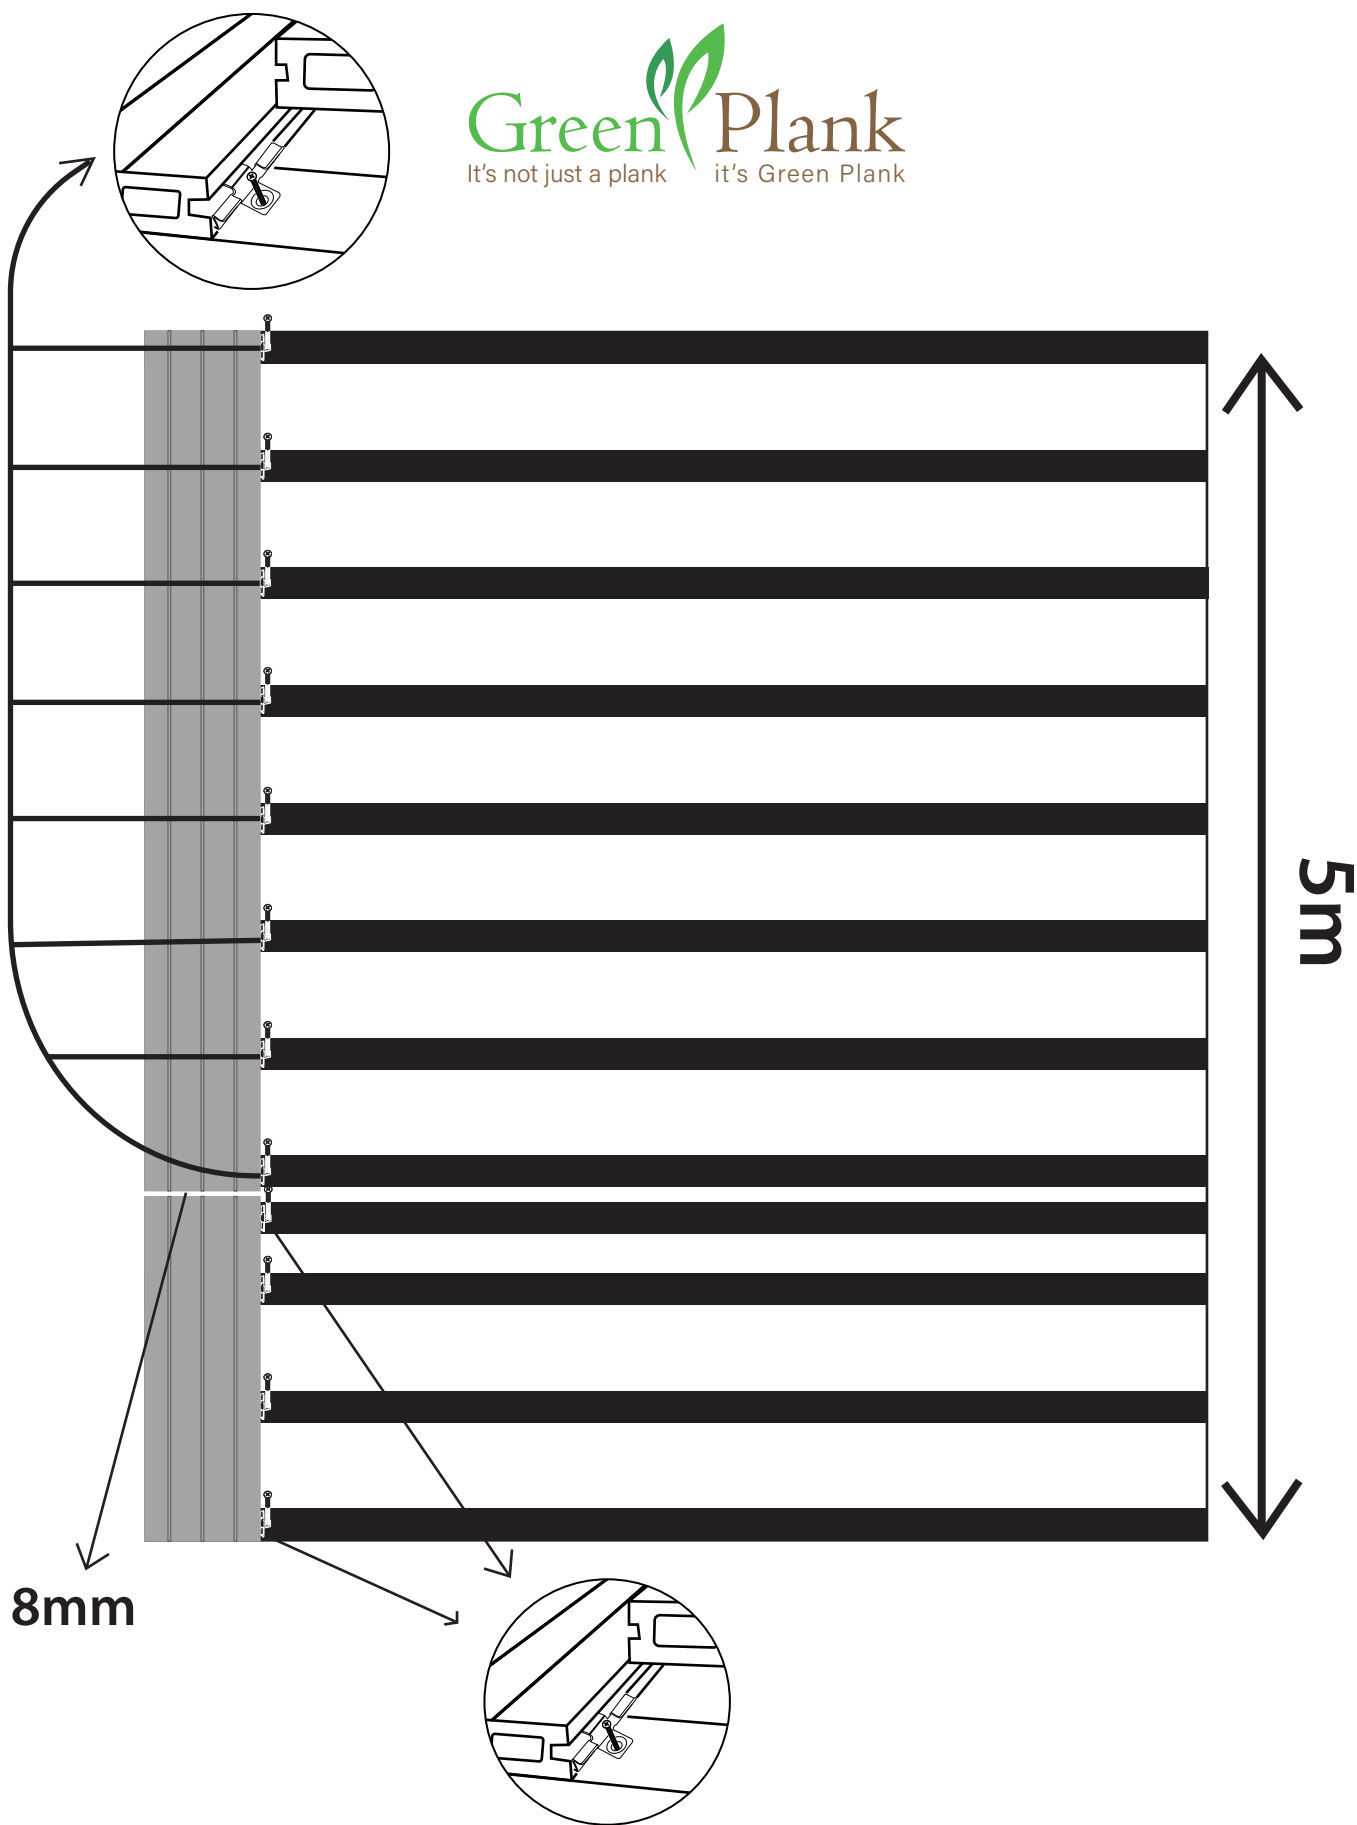

** Ni kan använda er av gummiplattor eller piedestaler för att få er lutning baserad på önskad höjd på däck

* Låt däckets acklimatisera i minst 72 timmar innan konstruktion

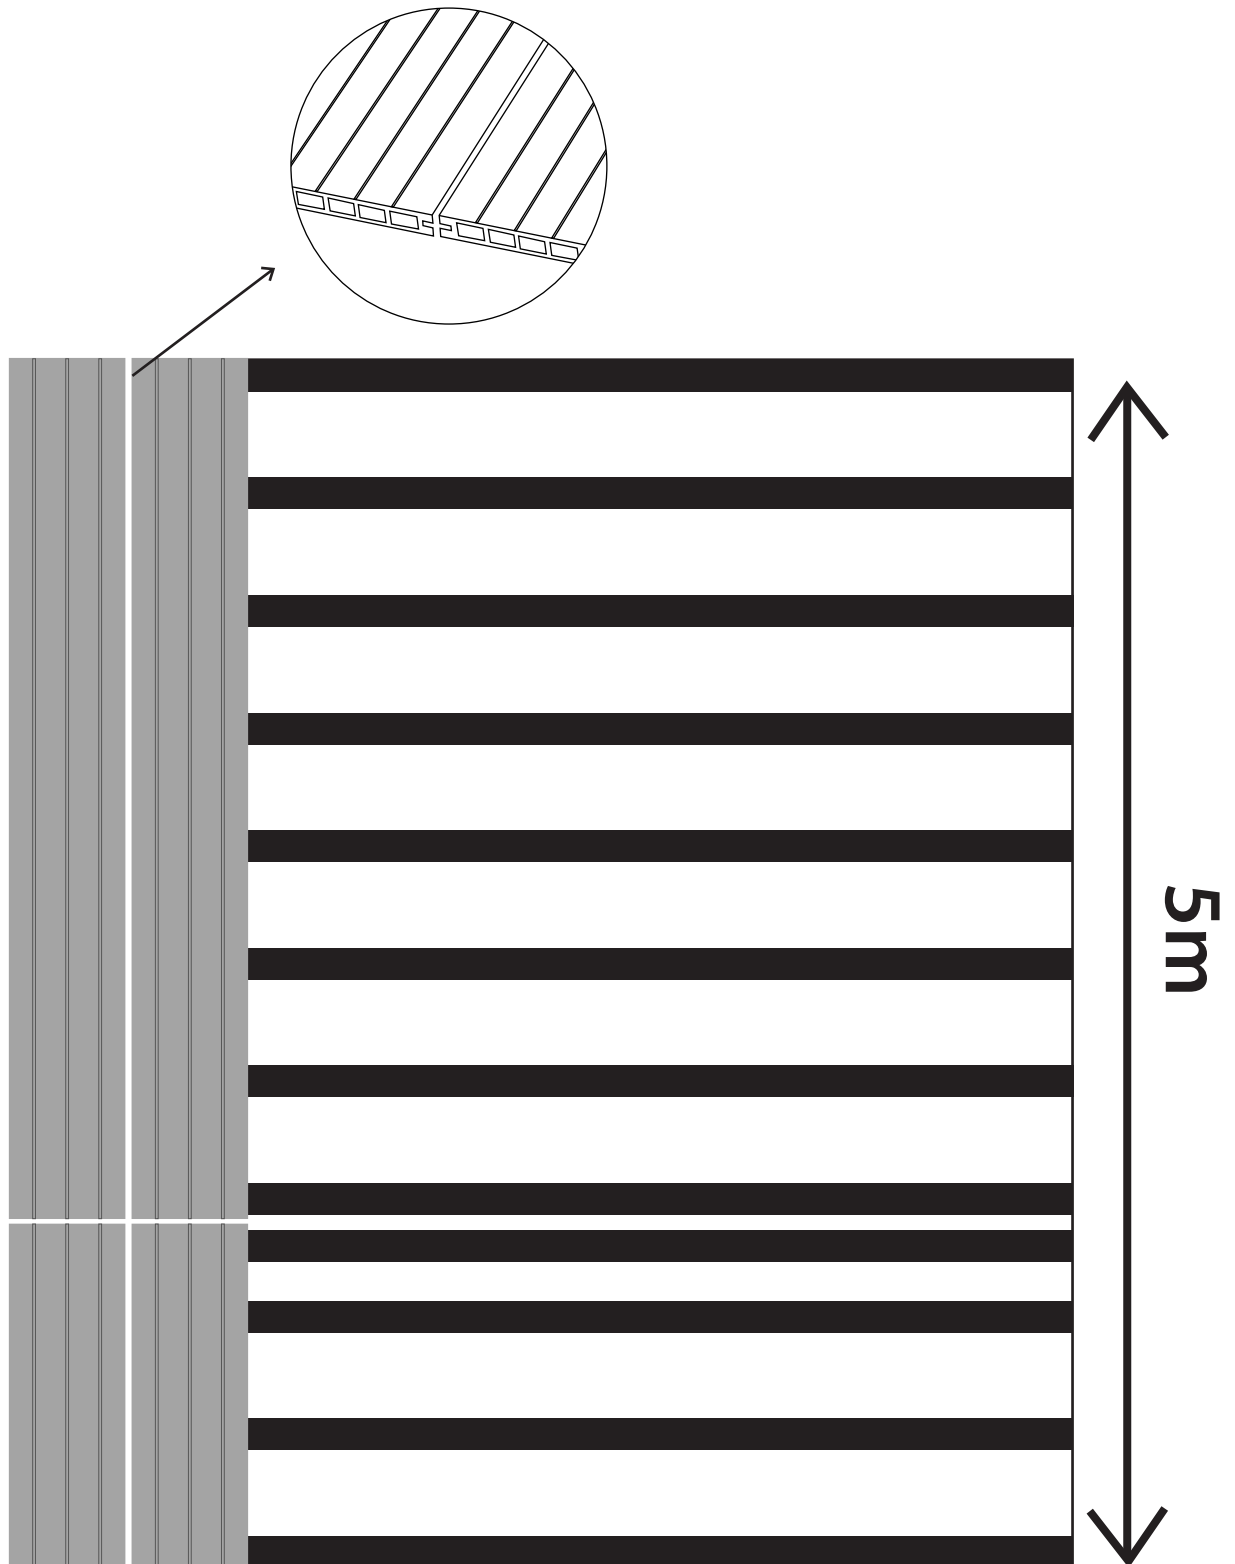

** Beskär alla brädor vid samma temperatur för att undvika misstag

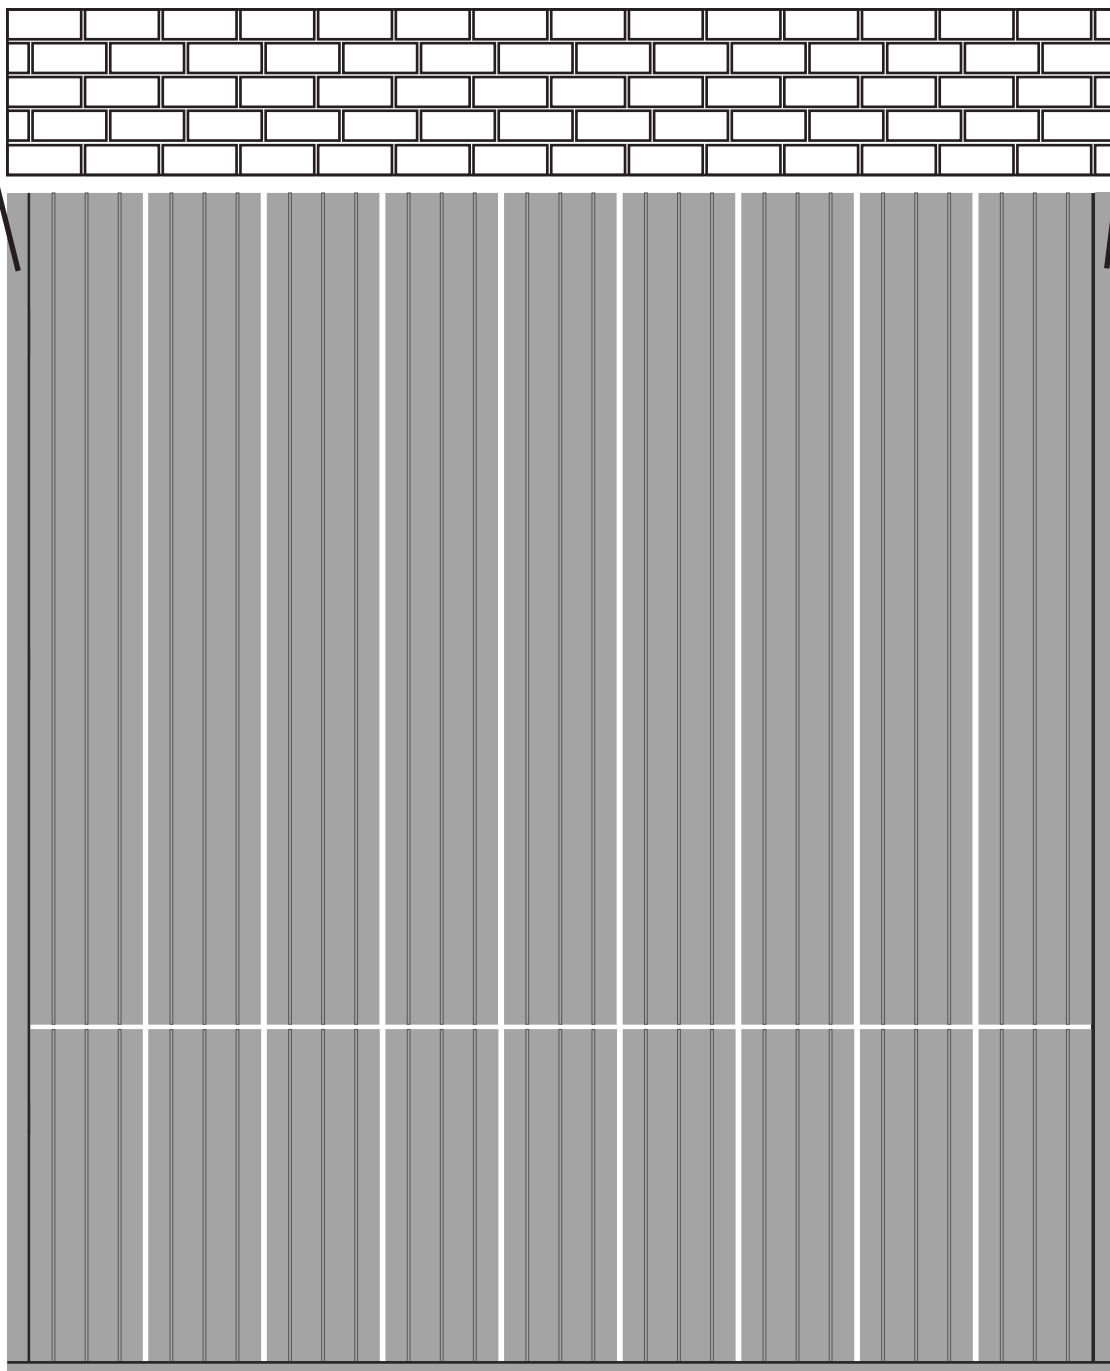

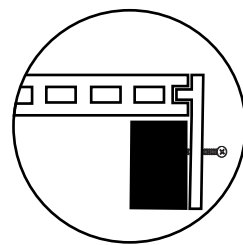

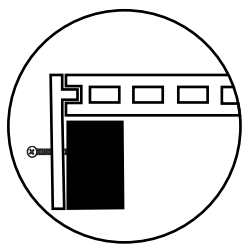

8mm

5m

Viktigast bör slutet på styrelserna vara i
separata klipp

Förborr hål för att säkra
täckbrädorna med skruvar
